**EDUCATION:**

Doctor of Medicine, 1998  
New York Medical College  
Valhalla, New York

Master of Science, Analytical Chemistry, 1994  
University of California, Riverside  
Riverside, California

Bachelor of Science, Biological Sciences, 1993  
University of California, Irvine  
Irvine, California

Bachelor of Science, Chemistry, 1993  
University of California, Irvine  
Irvine, California

**POST-GRADUATE  
TRAINING:**

Residency Training, Jul 1999 – Jun 2002  
Saint Louis University Department of OB/GYN  
Saint Louis, Missouri

Residency Training, Jul 1998 – Jun 1999  
MCP/Hahnemann University Department of OB/GYN  
Philadelphia, Pennsylvania

**HONORS:**

American Association of Gynecological Laparoscopists  
Award for Special Excellence in Endoscopic Procedures, 2002

Selected as PGY-4 Academic Chief Resident, St. Louis University, 2001

Highest CREOG Score in program, St. Louis University, 2002, 2001, 2000

Highest CREOG Score for PGY-1, MCP/Hahnemann, 1999

New York Medical College Trustee's Scholarship, 1996 – 1998

Graduated from University of California, Irvine *cum laude*, 1993  
Dean's List, 1989 – 1993  
National Golden Key Honor Society, 1993

**SOCIETIES:**

American Medical Association  
Medical Society of New Jersey  
American College of Obstetrics and Gynecology  
American Association of Gynecologic Laparoscopists

**RESEARCH:**

- 2002 – present Phase III clinical trial of Asoprisnil, TAP Pharmaceutical Products  
Involved in recruiting, screening and tracking patients in this study. My practice was invited to participate as a study site due to our volume and patient population. The drug has shown potential use for treatment of leiomyomas in both shrinking them and decreasing bleeding.
- 2000 – 2002 “Role of decorin and thrombospondin-2 in cervical effacement in pregnancy.”  
This study, which was subsequently accepted as an abstract and presented as a poster at the 2003 Annual SGI meeting in Washington, DC., was about the role that decorin/thrombospondin-2 plays on the softening of the connective tissue in the cervix. The subjects were between 26 and 37 weeks of gestational age, and the study group consisted of patients in labor, while non-laboring subjects comprised the control group. Tissue samples were collected from the lower uterine segment during primary cesarean section. The study demonstrated the importance of thrombospondin-2 and decorin in the cervical effacement during labor.
- 2000 – 2002 “Regulation of human ovarian granulosa cell function by hepatocyte growth factor and insulin-like growth factor I.”  
This was a joint project between the REI Program at St. Louis University and the School of Dentistry at Southern Illinois University. Involved in all phases of the project including certain administrative functions, patient recruitment, sample collection and data analysis.
- Summer 1995 Research with Dr. Weinstein (New York Medical College) in use of SPEC scan in Lyme Disease diagnosis. Wrote a grant proposal, which was subsequently approved, to DuPont requesting support for continued research.

**EMPLOYMENT:**

- August 2002 – present North Dover OB/GYN Associates  
Toms River, New Jersey  
OB/GYN Physician
- 1993 – 1994 University of California, Riverside  
Teaching assistant for undergraduate chemistry.
- Summer 1993 University of California, Irvine  
Lab assistant in microbiology lab.
